Register of exempt items that do not bear a compliance label

Under the Telecommunications (Labelling Notice for Customer Equipment and Customer Cabling) Instrument 2015 (Telecommunications Labelling Notice) suppliers of certain customer cabling and associated customer equipment (collectively, cabling products) have an alternative to labelling with a compliance label.

Suppliers who are eligible to use the alternative path (and therefore not affix the RCM mark to their product) are required to maintain a publicly available register (on the Internet) listing each of their compliant cabling products individually.

DINTEK Australia is an eligible supplier and has opted to use this alternative compliance arrangement.

Following is a list of DINTEK's compliant cabling products which do not have the RCM mark affixed:
